Art Unit: 3747

Applicant's election without traverse of Species II in the reply filed on 9/23/05 is acknowledged. Claims 1-15 are hereby withdrawn from consideration.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-17, 19-20, and 26-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Dowdy.

In particular, Dowdy teaches several embodiments wherein a felt-like material is used along a blade that can be made of either rubber or plastic. This material is used to hold chalk which is used as a marking substance for martial arts competitions (See columns 5 and 7).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 18 and 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dowdy in view of Zook

Dowdy applies as noted above and Zook teaches that moleskin is a well-known felt-like material that is normally attached to surfaces using an adhesive back.

The use of moleskin as described by Kook would have made it obvious to mount

Application/Control Number: 10/757,296

Art Unit: 3747

the material to either both sides of the blade as is effectively shown by Figure 8A of Dowdy, or one side of the blade, since the material is now attachable to the blade in the form of an adhesive backed sheet. The use of one or two sides would simply be a matter of choice with regard to the scoring system one wishes to use in the combat anticipated.

It would have been obvious to use moleskin as the material for chalk retention one either one or both sides of the blade because Dowdy taught the use of a felt-like material.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 21-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dowdy.

In particular, Dowdy teaches that both wood and metal have traditionally been used for the blade material of martial arts weapons and despite the fact that Dowdy prefers plastic and rubber because these materials are might be safer, the fact remains that metal and wood are materials that have other advantages such as wear resistance, thereby making the use of these materials still obvious to one of ordinary skill in the art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
